

FLEXI-BUS SHAFT INSTALLATION

1. see photo below. Fix bracket to the inside of the shaft trunking with the flexi-bus clamped and the cable tie holding the flexi-bus screened cable securely.
2. The small clamps are used to secure the flexi-bus every 5m
3. if the installation is inverted (bottom drive) use a small clamp to suspend the flexi-bus, the larger bracket can be fitted at the lower part of the shaft.
